

Acrylic Demo Cat

Being able to show your clients what an actual microchip looks like makes it so much easier to promote.

We can supply four different clear objects each containing an actual microchip that can be scanned and read.

Acrylic Dog
(FDX-A or FDX-B available)

Acrylic Cat
(FDX-B only)

Key rings
(FDX-A or FDX-B available)

Acrylic Block

- The acrylic cat is embedded with a microchip that can be scanned for client demonstrations.
- Clients appreciate seeing the actual size of a microchip and how the system works.
- Comes with a readable **ISO FDX-B** microchip.

SPECIFICATIONS
