

# WHY SELECT MICROCHIPS AUSTRALIA?

**Compare the differences and see that Microchips Australia delivers so much more!**

*A Trovan ISO (FDX-B) transponder is available through Microchips Australia or from your Veterinary Wholesaler or distributor, in packs of 5, 10, 20, 50, 100, 200, 500 & 1000, with implant details forwarded to Central Animal Records, ([www.car.com.au](http://www.car.com.au)) the FIRST microchip Registry to be accredited by the A.V.A. and authorised as a domestic animals microchip registry for the Queensland and Victorian Governments.*

**Pack Choice:**

**BASIC Pack**— Chip & National Registry listing for Life, including a numbered external collar tag, and DL sized (1/3rd of A4 size) Identification Acknowledgement forwarded directly to pet owner.

**STANDARD Pack**— Chip & National Registry listing for Life, including a numbered external collar tag, full A4 sized Certificate of Identification forwarded directly to pet owner, and website access for owners to view & update their own details.

**WHAT DO YOU GET?**

1. You receive a pre-sterilised packaged microchip with bar coded label and subscription form.
2. Listing for Life of the animal with Central Animal Records, a National Registry.
3. A numbered external tag at no extra charge, cross linked to microchip record.  
(35% of recoveries via Central Animal Records were possible because the microchipped pet was wearing it's external tag!)
