

Aquapocket

- IP65 rated
- No exposed external contacts
- Designed especially for use in aquaculture applications
- Connector for external antennas.

trovan[®] Aquapocket

Designed especially for use in Aquaculture applications, this reader has an internally rechargeable battery that can last for over 4,500 readings. It communicates with your PC via radio, for a robust, long-distance comms link. With its IP65 rating it is rugged and will tolerate exposure to very humid fresh- and salt-water environments. The reader features a charging cradle for easy recharging.

The external pole antenna is easily attached and removed by the customer, as needed.
